

# A Construction Company Presentation

---

STAVIZOL

# History

The company **STAVIZOL, s.r.o.**, Žilina has been established in the year 2001. We have operated through the private company Stavizol - Ing. Ivan Labuda since the year 1993 at the construction market, and, the company has been transformed step by step into the STAVIZOL, s.r.o.

The company has taken a stable position at the Slovak construction market, and, we have won many long-term clients by our high quality and flexibility.

Our company is oriented to execution of special kinds of construction works and we have been oriented to it since our very beginning.

STAVIZOL

# Company Activities

---

**New Buildings** - industrial new buildings,  
dwellings

## Consulting

# Capacities, Technologies, Quality Management

---

The company STAVIZOL, s.r.o. employs yearly about 60 permanent employees.

Our company disposes of complete equipment, necessary for execution of the work (e.g. - lorries and utility trucks, scaffoldings, UNC, VZV, small mechanization, complete technology for the sheathing, roof structures, ordinary construction works of GBP ABP...)

In the area of the damp-proofing, there we dispose of a large variety of equipment for melting-down the damp-proofing bitumen, PVC and TPO-based materials - by flame, hot air or by self-adhesive films, there. The PVC insulating materials are sealed by hot-air sealers.

High quality requirements and operation reliability of the industrial concrete floors require also a high quality and technically advanced machinery for its execution, which we must dispose of.

- there belong, inter alia, permanent measuring of planarity by laser level instruments within the materialization of the area
- a set of special tools for levelling and vibrating of concrete layers and casing elements of concrete areas borders
- vibrating rod for processing of laid concrete mixture and equipment for application of insulating solutions
- a set of the concrete mixture smoothing tools
- shrinkage joints cutting machine and technologies for its sealing

Highly qualified building surveyors, present at the building site, highly qualified workers, applying of certified materials and also appropriate cooperation with investor's building surveyor guarantee sound quality management and respecting of delivery times.

ISO 9001:2001
